### ANOVA ARCHITECTS NOW “ANOVA NEXUS”

March 2011 – ANOVA Architects, Inc. of Sacramento and Placerville, California is pleased to announce it is joining forces with Architectural Nexus of Salt Lake City and Logan, Utah. The Sacramento firm will now be known as **ANOVA Nexus**.

With the addition of the 130-person design staff found in Architectural Nexus, ANOVA Nexus is now considered one of the largest architecture firms in the Sacramento region. This strategic union provides ANOVA Nexus a robust resource of top design professionals for serving its California clients in the healthcare, higher education, municipal, cultural, recreational, commercial, and government markets.

Architectural Nexus is a vibrant and growing design firm working with clients throughout the Intermountain West. The firms’ combined depth of healthcare expertise and leadership includes a wide range of large regional acute and sub-acute care facilities including comprehensive/specialty care hospitals such as Huntsman Cancer Research Hospital in Salt Lake City, Utah, and primary/specialty care clinics such as Marshall Medical Center for Primary Care in Placerville, California. This expertise extends

into higher education with extensive completed research and lab facilities in the university environment. Additionally, the firms have diversified their portfolio to include the design of public infrastructure projects including libraries, performing art centers, recreation, and other municipal public facilities for a variety of communities in California and the Intermountain West.

The existing offices of ANOVA in Sacramento and Placerville will be maintained with the expectation of considerable growth given the work being generated in surrounding regions. “ANOVA Nexus is well positioned in terms of design expertise and production capacity for the recovery in California. I’m extremely optimistic moving into 2011 and look forward to the years ahead”, says Charlie Downs.
